

The Environmental and Societal impact of printing has understandably received increasing focus and scrutiny in recent years. The UK Printing Industry is generally acknowledged to be the 5th largest Industry in the UK and its impact on the Environment is broadly consistent with its overall contribution to the Economy.

As a growing provider of high impact decoration label solutions, Springfield Solutions recognises its responsibility to develop policies, procedures and practices, independently and in conjunction with its Stakeholders, to mitigate and minimise its impact on the Environment.

Springfield Solutions strongly believes that protection of the environment and reduction of the environmental impact of its Business Operations is a fundamental part of its corporate responsibility and makes good business sense.

In order to help achieve these goals the Managing Directors of Springfield Solutions have implemented, and now maintain and continually improve a formal Environmental Management System that satisfies the requirements of ISO14001 and any other compliance obligations that affect its Products and Services. They must also ensure that the importance of the Environmental Management System is effectively communicated.

We recognise that by continually improving our Environmental Management Systems and by establishing the context of the organization and understanding the needs and expectations of all interested parties we will ensure:

- We meet and satisfy the needs and expectations of all interested parties.
- Consistency and improvement of working practices.
- The Organization meets it's compliance obligations.
- Protection of the environment.
- Reduction of wastes and associated costs.
- Increased recycling and conservation of natural resources.

We aim to achieve environmental compliance through the setting and review of relevant objectives within our Quality Council and Management Review Meetings and by the use of trained and competent Personnel and the provision of adequate resources in order to deliver them.

Our overall aims are:

- To continually explore opportunities for recycling and to minimise the amount of waste to landfill.
- To integrate environmental and sustainable principles into our Company's operational procedures and to promote best-practice in every area and at every level.
- To continually improve our environmental performance, wherever, practicable.

This Policy is openly communicated to all Employees, Customers, Suppliers and is available to members of the Public and other interested parties via our website www.springfieldsolutions.co.uk
